Pre-fab Rack, Adjustable Gangways, Hose Arms Make Smooth Operation

This Rack, shipped in large welded sections, is easily erected on the jobsite with inexperienced personnel. It is equipped with adjustable gangways for safe access to the cars, no matter what the size, construction, or spotting of the car. Product is transferred with easy to operate, counter-balanced, hose arms that carry the

hose out to the car, hold it up while making connection, and carry it back to the rack after the operation, neatly storing it until needed again. All of these features provide an economical, safe, fast, and smooth operation.

Practical Process Control

Hands-On Training for engineers, scientists & techs on May 4 & 5, 2004 at UConn, Storrs. FREE 300 page book, PID tuning software demo and short course info at:

www.controlstation.com

Controllers increase plant safety and profitability, but only perform as well as their tuning. **Control Station** analyzes plant data to tune your PID controllers quickly and reliably.

Therminol Vapor Phase Design Guide

Therminol vapor phase heat transfer fluids are specifically designed to meet the demanding requirements of phase systems. This guide discusses three distinctly different Therminol vapor phase heat transfer fluids that allow users to select the one that best matches their needs-Therminol VP-1, Therminol VP-3 and Therminol LT.

Chemical Engineering Modeling Tool

COMSOL, Inc.'s FEMLAB puts you on the front line! FEMLAB Chemical Engineering comprises a powerful, unique environment for modeling momentum, heat and mass transport coupled to chemical reactions. Now you can model fluid flow, gas flow and incompressible turbulent flow using a single tool. FEMLAB's key features include: simultaneous solving of an arbitrary number of coupled nonlinear PDEs

and state-of-the-art solvers for linear and nonlinear stationary and time-dependent problems in 1D, 2D, and 3D. **www.comsol.com**

TSWEET®

Process simulation software makes plant operations, troubleshooting and optimization easier - Experience the difference of the TSWEET®- PROSIM® package and enjoy the power our software can offer your company.

- Amine Sweetening, Sulfur Recovery, Tail Gas Clean-up, Sour Water Strippers, Exchanger Rating/Sizing
- Gas Processing, Refining, Petro-

chemical, Glycol Dehydration and Hydrate Inhibition. **Bryan Research & Engineering, Inc. Tel: 979-776-5220 www.bre.com**

Piping Design Software

Chemstations has released CC-SAFETY NET for piping networks and safety relief systems, including two phase venting. These systems can be studied in a steady state or dynamic mode. The calculations use the core components of the CHEMCAD simulator: a full physical property database and set of thermodynamic options for calculating phase equilibrium; this sets CC-SAFETY NET apart and gives users distinct, bottom-line advantages.
