

### Chemical Engineering Modeling Tool

COMSOL Multiphysics® comprises a powerful, unique environment for modeling momentum, heat and mass transport coupled to chemical reactions. Now you can model fluid flow, gas flow and incompressible turbulent flow using a single tool! COMSOL Multiphysics' key features include: simultaneous solving of an arbitrary number of coupled nonlinear PDEs and state-of-the-art solvers for linear and nonlinear stationary and time-dependent problems in 1D, 2D, and 3D. **Tel: 781-273-3322; www.comsol.com**

### VMGSim™ Advanced Process Simulation

Process Simulation Software models refining, chemical and oil/gas processing. Now includes support for Sulfur plants and Amine treating modeling. Write custom reactor kinetics without programming knowledge. Create custom unit operations and economic models embedded in your process model using the embedded Excel™ operation. Embed HTRI Xchanger Suite™ or HTC STX/ACX™ exchanger ratings in the process model. Completely interactive, bidirectional simulation environment. **For more information visit our website at www.virtualmaterials.com**

### Proceedings of the AIChE Spring Meeting and 5th World Congress On Particle Technology

The proceedings of the AIChE Spring Meeting and 5th World Congress on Particle Technology are now available for purchase. The proceedings are a boxed 2-CD set that contains over 1,400 technical papers and includes more than 700 papers from the 5th World Congress on Particle technology, in addition to the papers from the 2nd Global Congress on Process Safety and the 18th Ethylene Producers Conference. The proceedings are organized in an easy-to-use and fully searchable format and cover more than 250 technical sessions and 16 topical conferences, including the 21st CCPS International Conference, 40th Loss Prevention Symposium and 8th Process Plant Safety Symposium. The cost for individual use is \$120.

Also still available for purchase are the 2005 AIChE Annual Meeting 2-CD-ROM Set and DIERS Conference Book. The Annual Meeting Proceedings contain over 4,450 technical papers (including those from the Management conference and abstracts from the DIERS conference). "Managing Chemical Reactivity with Confidence" is the theme of the 545-page hard-covered DIERS Book — 3rd International Symposium of Runaway Reactions, Pressure Relief Design, and Effluent Handling. Both are available for \$120 each. These invaluable resources can be purchased online at <http://shop.omnipress.com> or calling Omnipress at 800-828-0305 or 608-246-2600 (international callers) or faxing 608-246-4237.
