

ELIMINATE VALVE CAVITATION

- Place one or more diffusers downstream of a valve to eliminate cavitation
- Eliminate noise
- Eliminate pipe vibration
- Reduce valve first costs
- Reduce valve maintenance

Designed to monitor high, intermediate or low point-level detection on dry bulk solids as well as liquids or slurries, the Dynatrol® Level Detectors are available in corrosion-resistant coatings. The compact, rugged detectors are built in the USA and are solidly constructed for a long operating life. They have no moving parts, require no adjustments and are virtually wear-free – delivering a worry-free solution for your demanding service conditions.

Request your copy of the latest Dynatrol® catalog - on CD!

Covers the complete Dynatrol® line of level switches & detectors, on-stream process analyzers, measurement & control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.

Measure Color...Measure Quality

Color Measurement Systems

Stop using subjective visual methods of reporting color, the lack of color or yellowness.
Start using objective instrumental methods and gain the benefits of sensitivity, precision and accuracy.

- ◆ Measure metrics such as Saybolt, APHA/PtCo/Hazen, Gardner Scale, ASTM D1500, yellowness/whiteness and haze.
- ◆ Measure reflected or transmitted color for materials in the form of solids, sheets, films, pellets, granules, tablets, powders, paste and liquids.
- ◆ Portable, Benchtop and On-line Systems

Great Step Forward for Green Chemistry

HSC Chemistry® 6 process calculation software now contains a new flowsheet simulation module which makes it possible to optimize process output and minimize waste materials. HSC may be used to rapidly focus expensive experimental research towards ideal process conditions. With 21 calculation modules and 11 databases at your fingertips, HSC 6 is an invaluable tool for any process engineer or scientist.

Chemical Engineering Modeling Tool

COMSOL Multiphysics® comprises a powerful, unique environment for modeling momentum, heat and mass transport coupled to chemical reactions. Now you can model fluid flow, gas flow and incompressible turbulent flow using a single tool! COMSOL Multiphysics' key features include: simultaneous solving of an arbitrary number of coupled nonlinear PDEs and state-of-the-art solvers for linear and nonlinear stationary and time-dependent problems in 1D, 2D, and 3D. **Tel: 781-273-3322; www.comsol.com**

ProMax® is a powerful and versatile stream based process simulation package used for the design and optimization of gas gathering, amine sweetening, gas processing, refining and chemical facilities. **ProMax** contains over 50 thermodynamic package combinations, 2300 pure components, OLE automation, oil characterization, Microsoft® Excel® spreadsheet embedding and utilizes Microsoft Visio® as the drawing package. BR&E recently announced the release of **ProMax** version 2.0. This version of **ProMax** contains a complete reactor suite for modeling kinetic (plug flow and stirred tank), equilibrium, conversion, and Gibbs minimization schemes. This new feature along with many additional enhancements combines to uphold **ProMax's** reputation as the "must have" simulation tool for engineers around the world.

The Proceedings of the AIChE Annual Meeting and the AES Annual Meeting are now available for purchase. This CD-ROM contains over 5,000 technical abstracts and papers. Organized in an easy-to-use and fully searchable format, the proceedings cover more than 700 technical sessions and 16 topical conferences. The cost for individual use is \$130 plus shipping. These proceedings, as well as other AIChE conference proceedings, can be purchased online at <http://shop.omnipress.com> or by calling Omnipress at **800-828-0305** or **608-246-2600** (international callers) or faxing **608-246-4237**.

Now Hear This!

CEP subscribers are the chemical engineers and technical managers who specify and buy equipment and services. Advertise in CEP and reach an exclusive audience of engineering professionals with the purchasing power that you won't reach in other trade publications.

Bonus: Your CEP Showcase ad will also be included in the digital edition of the magazine with a free hyperlink to your website. CEP Showcase provides frequency - a major component in any successful advertising campaign - at an affordable rate.

To be included in the CEP Showcase:

Wonder Gel

Stainless Steel Pickling Gel

Achieve maximum corrosion resistance to stainless steel. Surface contamination may drastically reduce the life of stainless steel. Wonder Gel removes (**pickles**) stubborn impurities, cleans the toughest slag, scale and heat discoloration and restores (**passivates**) the protective chromium oxide layer.

Mixing Solutions for Multiple Tank Configurations

Expect Engineered Excellence

"Lodera Crokiaan's new Pulsair equipped state-of-the-art Palm Oil Refinery Rotterdam, Netherlands. 2006"

Pulsair pneumatic mixers are the undisputed leader in Process Control Management. Our systems are designed to operate on minimal nitrogen, thus eliminating temperature fluctuation and specific gravity stratification in tanks. The **Pulsair** System operates multiple tanks exceeding one million gallons each or more, with one programmable controller, creating a consistent viscosity every time.

VMGSim™ Integrated Steady State and Dynamic Simulation.

Easily create process models of refining, chemical and oil/gas processing to troubleshoot, design or optimize your plant. Create steady state models, size and rate vessels, columns and heat exchangers. Add your control system to the model and click a button to run dynamically. Use the dynamic wizards to create and run dynamic depressuring and blowdown studies and model multistage compressors and antisurge control. Create custom unit operations and economic models embedded in your process model by dragging the Excel operation onto your PFD. Graphical User interface driven by embedded Visio. Completely Interactive, bidirectional simulation solver.

SuperChems for DIERS

A dynamic simulator, SuperChems for DIERS is capable of performing emergency relief system and effluent handling designs.

With software based on DIERS methodology, you have the power to design emergency relief systems that meet OSHA 1910.119, ASME Section I, IV and VIII, and corporate requirements. SuperChems helps you compile raw process data into customized documentation. Rigorous modeling capabilities allow you to model simple single, multiphase, reacting, and highly non-ideal systems and easily run what-if scenario or sensitivity analyses. A database of 1,200 industrial chemicals and spreadsheet-based interface makes inputting and reporting quick and easy.
