

# SuperChems for DIERS

**A dynamic simulator, SuperChems for DIERS is capable of performing emergency relief system and effluent handling designs.**

With software based on DIERS methodology, you have the power to design emergency relief systems that meet OSHA 1910.119, ASME Section I, IV and VIII, and corporate requirements. SuperChems helps you compile raw process data into customized documentation. Rigorous modeling capabilities allow you to model simple single, multiphase, reacting, and highly non-ideal systems and easily run what-if scenario or sensitivity analyses. A database of 1,200 industrial chemicals and spreadsheet-based interface makes inputting and reporting quick and easy.

## Simulis Thermodynamics: reliability and consistency of property calculations

Because quality of engineering calculations rests heavily on the representation of the thermodynamic behavior, engineers need tools that ensure its reliability and accuracy.

Simulis Thermodynamics is an affordable software component that provides a comprehensive set of proven thermo-chemical calculation services: transport and thermodynamic properties, phase equilibria calculations, flashes, data regression, phase envelopes...

Advanced integration features ensure consistency of calculations throughout the company as engineers can use Simulis Thermodynamics within a wide range of environments: MS-Excel, MATLAB, in-house software or any CAPE-OPEN compliant software package.

## Dynatrol®

www.DynatrolUSA.com  
Toll free 800.231.2062 Phone 713.869.0361 Fax 713.869.7332

Designed to monitor high, intermediate or low point-level detection on dry bulk solids as well as liquids or slurries, the **Dynatrol®** Level Detectors are available in corrosion-resistant coatings. The compact, rugged detectors are built in the USA and are solidly constructed for a long operating life. They have no moving parts, require no adjustments and are virtually wear-free – delivering a worry-free solution for your demanding service conditions.

Request your copy of the latest **Dynatrol®** catalog - on CD!

Covers the complete **Dynatrol®** line of level switches & detectors, on-stream process analyzers, measurement & control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.

**The Proceedings of the 2007 AIChE Annual Meeting** are now available for purchase. This CD-ROM contains more than 3,700 technical abstracts and 800 papers. Organized in an easy-to-use and fully searchable format, the proceedings cover nearly 660 technical sessions and 16 topical conferences. The cost for individual use is \$130 plus shipping. These proceedings, as well as other AIChE conference proceedings, can be purchased online at <http://shop.omnipress.com> or by calling Omnipress at 800-828-0305 or 608-246-2600 (international callers) or faxing 608-246-4237.

## Free COMSOL Conference CD

COMSOL®, Inc. is now offering a free copy of the 2008 edition of the User Presentations CD! The CD is a compilation of over 250 user contributed slides, papers and models presented at the Boston and Grenoble Conferences. This unique presentation and proceedings CD covers a wide variety of applications including Chemical Engineering, Fluid Dynamics, Heat Transfer, Reaction Engineering and much more.

## VMGSim™ Integrated Steady State and Dynamic Simulation.

Easily create process models of refining, chemical and oil/gas processing to troubleshoot, design or optimize your plant. Create steady state models, size and rate vessels, columns and heat exchangers. Add your control system to the model and click a button to run dynamically. Use the dynamic wizards to create and run dynamic depressuring and blowdown studies and model multistage compressors and antisurge control. Create custom unit operations and economic models embedded in your process model by dragging the Excel operation onto your PFD. Graphical User interface driven by embedded Visio. Completely Interactive, bidirectional simulation solver.
