

Meticulous Verification

Meticulous Verification by knowledgeable independent parties helps companies evaluate their process safety programs from an independent perspective.

What does it mean in 20/20?

Companies use various assessment techniques to assure their process safety management systems are working as intended.

It will become standard practice for companies to supplement internal audits with competent third-party verification of their engineered systems and process safety management systems.

Third-party technical experts verify specific technical details.

Public and non-governmental organizations evaluate implementation of company process safety programs.

What is the value?

Third-party assessments may identify additional opportunities for improvement in company process safety management and can enhance stakeholder relationships.

Meticulous Verification supports a partnership to challenge each other to deliver great process safety performance.

What can I do?

- Identify opportunities where third-party verification could add value.
- Personally support external verification in your area when it occurs.
