

CLIMATE MATTERS. GET INVOLVED.

CEP Announces Special Issue on Climate

Climate change is one of the greatest challenges of our time. With our education in chemistry, physics, and mathematics, chemical engineers are well equipped to understand this complex issue and find cost effective ways to make an impact. Our training in systems-oriented problem solving makes us uniquely qualified to develop and implement technologies that mitigate and adapt to climate change.

This Special Issue of *CEP* will provide chemical engineers with straightforward information about climate and climate change that can serve as a foundation for developing effective climate solutions. This must-read special issue will be available in a digital flipbook format for members as well as non-members reaching 100,000+ process and chemical engineers through a robust marketing plan including social media, email, and retargeting.

Opportunities to be a part of this Special Issue include:

- ▶ Supporting sponsorship
- ▶ Full page brand display advertising
- ▶ Sponsored content highlighting case studies, programs and corporate initiatives aimed at addressing climate change *limited*

CEP

Deadline for reserving space in this climate dedicated issue of *CEP* is December 11th, with the issue live January 2021.

For more information on ways to participate in this issue, or to reserve your spot, please contact: **Tania Babiuk | AIChE® | tanib@aiche.org**
