VMG Thermo™

VMGThermo™ is a Thermo Physical Property System Add-in provided as a software development toolkit consisting of callable DLLs and OLE/COM components. VMGThermo™ enables software developers to quickly implement rigorous thermo property packages in almost any application. Includes API's for most popular development platforms, including VB, C++, Excel™, Matlab™. Supports Windows™ and Linux™. Features the largest commercially available pure component database with other 5,000 components; a full range of EOS and Activity coefficient methods including comprehensive built-in interaction parameters. Includes support for oil characterization and refinery properties. Extensively validated. www.virtualmaterials.com

Chemical Engineering Modeling Tool

COMSOL, Inc.'s FEMLAB puts you on the front line! FEMLAB Chemical Engineering comprises a powerful, unique environment for modeling momentum, heat and mass transport coupled to chemical reactions. Now you can model fluid flow, gas flow and incompressible turbulent flow using a single tool. FEMLAB's key features include: simultaneous solving of an arbitrary number of coupled nonlinear

PDEs and state-of-the-art solvers for linear and nonlinear stationary and time-dependent problems in 1D, 2D, and 3D. www.comsol.com

ProMax® with TSWEET® & PROSIM®

ProMax® is a powerful and versatile stream based process simulation package for the design and optimization of gas gathering, amine sweetening, gas processing, refining, and chemical facilities. **Bryan Research & Engineering, Inc.** Tel: 979-776-5220; www.bre.com
