

## ROTARY SHAFT STYLE SOLENOID VALVES

All solenoid components are completely isolated from the process fluid. Easily handles extremely corrosive, dirty or viscous fluids, cryogenic and high temperature applications.

- 1/2" to 6" pipe size
- All 316 Stainless Steel construction (other materials available)
- NEMA 4X and Explosion Proof solenoid enclosure
- Position Switches, Manual Override and other options
- Emergency Shutoff with Manual Reset option available.

## Mixing Solutions for Multiple Tank Configurations

*Expect Engineered Excellence*

*"Loders Crokalan's new Pulsair equipped state-of-the-art Palm Oil Refinery Rotterdam, Netherlands. 2006"*

**P**ulsair pneumatic mixers are the undisputed leader in Process Control Management. Our systems are designed to operate on minimal nitrogen, thus eliminating temperature fluctuation and specific gravity stratification in tanks. The Pulsair System operates multiple tanks exceeding one million gallons each or more, with one programmable controller, creating a consistent viscosity every time.

**D**ynatrol® G-Series Level Detector Switches Designed for the measurement challenges of extremely light powders or bulk solids that pack and bridge easily. The Dynatrol® provides a worry-free solution for your demanding service conditions.

Request your copy of the latest Dynatrol® catalog - on CD!

Covers the complete Dynatrol® line of level switches & detectors, on-stream process analyzers, measurement & control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.

## CALGON CARBON CORPORATION

Calgon Carbon Corporation's Cyclesorb®, Cyclesorb® FP2, and Cyclesorb® HP are compact, portable liquid treatment units containing all the elements of full scale carbon adsorption systems. They are ideal for low flow or short duration projects, contamination by leaking underground tanks, and storage tank or pipeline washing.

## Great Step Forward for Green Chemistry

**HSC Chemistry® 6** process calculation software now contains a new flowsheet simulation module which makes it possible to optimize process output and minimize waste materials. HSC may be used to rapidly focus expensive experimental research towards ideal process conditions. With 21 calculation modules and 11 databases at your fingertips, HSC 6 is an invaluable tool for any process engineer or scientist.

## Chemical Engineering Modeling Tool

**COMSOL Multiphysics®** comprises a powerful, unique environment for modeling momentum, heat and mass transport coupled to chemical reactions. Now you can model fluid flow, gas flow and incompressible turbulent flow using a single tool! COMSOL Multiphysics' key features include: simultaneous solving of an arbitrary number of coupled nonlinear PDEs and state-of-the-art solvers for linear and nonlinear stationary and time-dependent problems in 1D, 2D, and 3D. ## Now Hear This!

*CEP subscribers are the chemical engineers and technical managers who specify and buy equipment and services. Advertise in CEP and reach an exclusive audience of engineering professionals with the purchasing power that you won't reach in other trade publications.*

*Bonus: Your CEP Showcase ad will also be included in the digital edition of the magazine with a free hyperlink to your website. CEP Showcase provides frequency - a major component in any successful advertising campaign - at an affordable rate.*

**To be included in the CEP Showcase:**
