New Filter for Agglomerative Dust

This brochure from Donaldson® Torit® includes information on new Ultra-Web® SB filters, a tougher filter media for dust collection in manufacturing processes that face challenges from agglomerative dust. Ultra-Web SB filters combine the efficiency of nanofiber technology with a strong spunbond substrate to provide durability, moisture and chemical tolerance, long life, high efficiency and energy savings compared to other spunbond or meltblown media. The brochure contains technical data, MERV efficiency comparisons, performance graphs and cost savings calculations.

Measure Color ... Measure Quality

Stop using subjective visual methods of reporting color, the lack of color or yellowness. **Start** using objective instrumental methods and gain the benefits of sensitivity, precision and accuracy. The **UltraScan® PRO** spectrophotometer measures reflected and transmitted color of solids, sheets, films, pellets, granules, tablets, powders, pastes & liquids.

- Meets CIE, ASTM & USP guidelines for accurate color measurement.
- 5 nm optical resolution enables the precise measurement of samples having sharp cutoff characteristics.
- Quantifies color, APHA, achromaticity, whiteness & yellowness of a wide range of chemical products.

Mixing Systems Brochure

The brochure describes Pulsair's mixing systems that release sequential pulses of air or gas to mix tank contents. Systems are adaptable from a single 55-gallon drum to multiple 1 million gallon tanks and can be managed from a central control unit. Pulsair mixers are currently in use worldwide in the petroleum, lubricant, wastewater, food and wine industries.

Stainless Steel Pickling Gel

Achieve maximum corrosion resistance to stainless steel. Surface contamination may drastically reduce the life of stainless steel. Wonder Gel removes (**pickles**) stubborn impurities, toughest scale, slag and heat discoloration and restores the protective chromium oxide layer (**passivation**).

High Quality Plastic Piping Systems

Fabricated Plastics Limited offers Industry a full spectrum of High Quality, Corrosion Resistant Plastic Piping Systems, designed and fabricated for a wide range of conditions and temperatures. End-users now have a choice of a variety of materials, from solid FRP to Thermoplastic-Lined FRP. Lining choices include PVC, CPVC, PP, PVDF, E-CTFE, FEP, PFA and TEFZEL. Our 10 Page Brochure outlines Material Selection, Material Properties, Joining Methods and Dimensional Details.
