EcReCon Inc.

Economy Recovery Conservation
 Serving the chemical, petrochemical, plastics, pharmaceutical and food industries

We Stock: TANKS * VESSELS
 * REACTORS * HEAT EXCHANGERS
 * CHILLERS * COLUMNS * MILLS
 * SCREENERS * SILOS
 * DUST COLLECTORS * MIXERS
 * BLENDERS * PUMPS * CENTRIFUGES
 * DRYERS * FILTERS * COMPRESSORS
 * AND MUCH MORE!

EcReCon has over 20 acres of surplus process equipment available for sale.

SuperChems for DIERS

A dynamic simulator, SuperChems for DIERS is capable of performing emergency relief system and effluent handling designs.

With software based on DIERS methodology, you have the power to design emergency relief systems that meet OSHA 1910.119, ASME Section I, IV and VIII, and corporate requirements. SuperChems helps you compile raw process data into customized documentation. Rigorous modeling capabilities allow you to model simple single, multiphase, reacting, and highly non-ideal systems and easily run what-if scenario or sensitivity analyses. A database of 1,200 industrial chemicals and spreadsheet-based interface makes inputting and reporting quick and easy.

Great Step Forward for Green Chemistry

HSC Chemistry[®] 6 process calculation software now contains a new flowsheet simulation module which makes it possible to optimize process output and minimize waste materials. HSC may be used to rapidly focus expensive experimental research towards ideal process conditions. With 21 calculation modules and 11 databases at your fingertips, HSC 6 is an invaluable tool for any process engineer or scientist.

Intelligen Suite

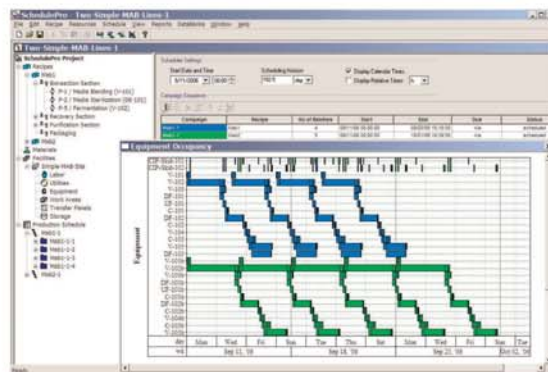

The Market-Leading Engineering Suite for Modeling, Evaluation, Scheduling, and Debottlenecking of Single & Multi-Product Facilities

SuperPro

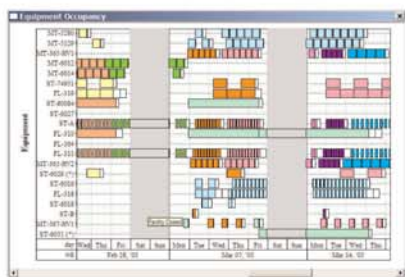

Use SuperPro Designer to model, evaluate, and debottleneck batch and continuous processes

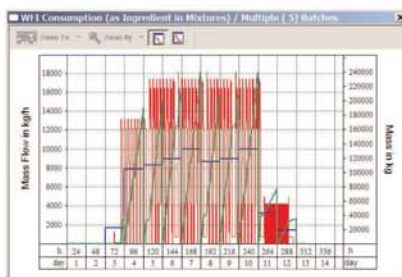

SchedulePro

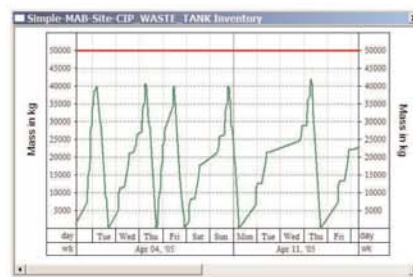

Switch to SchedulePro to schedule, model, and debottleneck multi-product facilities

Tracking of equipment occupancy in multi-product facilities

Tracking demand for resources (e.g., labor, materials, utilities, etc.)

Inventory tracking for raw materials, intermediates, products, and wastes

SuperPro Designer is a comprehensive process simulator that facilitates modeling, cost analysis, debottlenecking, cycle time reduction, and environmental impact assessment of biochemical, specialty chemical, pharmaceutical (bulk & fine), food, consumer product, mineral processing, water purification, wastewater treatment, and related processes. Its development was initiated at the Massachusetts Institute of Technology (MIT). SuperPro is already in use at more than 400 companies and 500 universities around the world (including 18 of the top 20 pharmaceutical companies and 9 of the top 10 biopharmaceutical companies).

SchedulePro is a versatile finite capacity scheduling tool that generates feasible production schedules for multi-product facilities that do not violate constraints related to the limited availability of facilities, equipment, resources and work areas. It can be used in conjunction with SuperPro (by importing its recipes) or independently (by creating recipes directly in SchedulePro). Any industry that manufactures multiple products by sharing production lines and resources can benefit from the use of SchedulePro. Engineering companies use it as a modeling tool to size utilities for batch plants, identify equipment requirements, reduce cycle times, and debottleneck facilities.
