

Mixing Solutions for Multiple Tank Configurations

Expect Engineered Excellence

"Loders Crokiaan's new Pulsair equipped state-of-the-art Palm Oil Refinery Rotterdam, Netherlands. 2006"

Pulsair pneumatic mixers are the undisputed leader in Process Control Management. Our systems are designed to operate on minimal nitrogen, thus eliminating temperature fluctuation and specific gravity stratification in tanks. The **Pulsair** System operates multiple tanks exceeding one million gallons each or more, with one programmable controller, creating a consistent viscosity every time.

STAINLESS VALVE CO.

Visit us at ISA 2007 Booth #2724

**This is NOT a knife gate valve!
The "flat ball valve"**

- Custom designed to applications 4" to 72" with pressure ratings up to 1500#. Higher pressures available.
- For demanding high temperature, pressure shock waves, and aggressive flow media applications.
- Designed to be abrasion & corrosion resistant.
- Manufactured in Duplex, Hastelloy, Inconel, titanium grade 2, stainless steel 304, 316, 317 etc, any plate material.

*We replace ball valves, knife gate valves, butterfly valves, and others.....
Our valves are made to last!*

VMGSim™ Integrated Steady State and Dynamic Simulation.

Easily create process models of refining, chemical and oil/gas processing to troubleshoot, design or optimize your plant. Create steady state models, size and rate vessels, columns and heat exchangers. Add your control system to the model and click a button to run dynamically. Use the dynamic wizards to create and run dynamic depressuring and blowdown studies and model multistage compressors and antisurge control. Create custom unit operations and economic models embedded in your process model by dragging the Excel operation onto your PFD. Graphical User interface driven by embedded Visio. Completely Interactive, bidirectional simulation solver.

Designed to monitor high, intermediate or low point-level detection on dry bulk solids as well as liquids or slurries, the **Dynatrol®** Level Detectors are available in corrosion-resistant coatings. The compact, rugged detectors are built in the USA and are solidly constructed for a long operating life. They have no moving parts, require no adjustments and are virtually wear-free – delivering a worry-free solution for your demanding service conditions.

ProMax® is a powerful and versatile stream based process simulation package used for the design and optimization of gas gathering, amine sweetening, gas processing, refining and chemical facilities. **ProMax** contains over 50 thermodynamic package combinations, 2300 pure components, OLE automation, oil characterization, Microsoft® Excel® spreadsheet embedding and utilizes Microsoft Visio® as the drawing package. BR&E recently announced the release of **ProMax** version 2.0. This version of **ProMax** contains a complete reactor suite for modeling kinetic (plug flow and stirred tank), equilibrium, conversion, and Gibbs minimization schemes. This new feature along with many additional enhancements combines to uphold **ProMax's** reputation as the "must have" simulation tool for engineers around the world.

300 Multiphysics Presentations

COMSOL®, Inc. is now offering a free copy of the 2006 User Presentations CD! The CD is a compilation of over 300 user contributed slides, papers and models presented at multiphysics conferences worldwide. This unique presentation and proceedings CD covers a wide variety of applications including Chemical Engineering, Fluid Dynamics, Heat Transfer, Reaction Engineering and much more.
