

INOX-TECH

Specializing in full-service system design and integration

Including the custom fabrication of:
LIQUID FERMENTATION SYSTEMS

Uni-tank or Multi-tank
Stand-alone or integrated units
Manual, semi-automated or
Fully-automated (menu-driven)
Skid-mounted, fixed or portable

Optional :
Ph Control, Agitation & Cooling

Ask us about our Bioreactors, Pressure Vessels
& Specialty process tanks and Systems

SERFILCO®

You asked and SERFILCO® delivers.®
Exceptional prices AND quick delivery for a new line of molded horizontal and vertical centrifugal pumps of corrosion / chemical resistant materials. Designed, tested and manufactured in the USA by SERFILCO for demanding applications requiring high flow and high TDH.

Available in various configurations including ANSI flanged, long-coupled, and single or double mechanical seals with silicone carbide faces. Paired with exclusive and enhanced "SERFILCO DUTY" motors ensures low maintenance and long trouble-free service life.

ACTARIS

an Itron Company

2007 Chem Show - Booth 733

Come learn about our complete line of industrial measurement systems, including the new Datamate 2200 mass flow transmitter.

With over a century of experience in liquid measurement, Actaris has the solution for your measurement, batching, inventory, or loading application.

300 Multiphysics Presentations

COMSOL®, Inc. is now offering a free copy of the 2006 User Presentations CD! The CD is a compilation of over 300 user contributed slides, papers and models presented at multiphysics conferences worldwide. This unique presentation and proceedings CD covers a wide variety of applications including Chemical Engineering, Fluid Dynamics, Heat Transfer, Reaction Engineering and much more.

Toll free 800.231.2062 Phone 713.869.0361 Fax 713.869.7332

Designed to monitor high, intermediate or low point-level detection on dry bulk solids as well as liquids or slurries, the **Dynatrol®** Level Detectors are available in corrosion-resistant coatings. The compact, rugged detectors are built in the USA and are solidly constructed for a long operating life. They have no moving parts, require no adjustments and are virtually wear-free – delivering a worry-free solution for your demanding service conditions.

Request your copy of
the latest **Dynatrol®**
catalog - on CD!

Covers the complete **Dynatrol®** line of level switches & detectors, on-stream process analyzers, measurement & control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.

VMGSim™ Integrated Steady State and Dynamic Simulation.

Easily create process models of refining, chemical and oil/gas processing to troubleshoot, design or optimize your plant. Create steady state models, size and rate vessels, columns and heat exchangers. Add your control system to the model and click a button to run dynamically. Use the dynamic wizards to create and run dynamic depressuring and blowdown studies and model multistage compressors and antisurge control. Create custom unit operations and economic models embedded in your process model by dragging the Excel operation onto your PFD. Graphical User interface driven by embedded Visio. Completely Interactive, bidirectional simulation solver.
