

Mixing Systems Brochure

The brochure describes Pulsair's mixing systems that release sequential pulses of air or gas to mix tank contents. Systems are adaptable from a single 55-gallon drum to multiple 1 million gallon tanks and can be managed from a central control unit. Pulsair mixers are currently in use worldwide in the petroleum, lubricant, wastewater, food and wine industries.

Particulate Monitors for Stacks and Baghouses

- Simple to use
- Rugged and Reliable
- Ideal for EPA MACT

The EM Series particulate (dust) emission monitors, baghouse leak detectors and process flow monitors employ field-proven induction-sensing, protected-probe and automatic self check technologies to provide high reliability and simple operation. Instruments are ideal for harsh applications including chemical, coal, cement, steel, carbon black, smelters, kilns and dryers. Benefits include stack monitoring, detecting emissions before they are visible, eliminating cleanup costs, preventing the escape of valuable powders and protecting downstream equipment such as blowers and HEPA filters. **Contact FilterSense: (978) 927-4304, www.filtersense.com**

"We Make Measuring Color Easy for You"

The UltraScan® PRO spectrophotometer measures reflected and transmitted color and meets CIE, ASTM and USP guidelines for accurate color measurement. Its 5nm optical resolution enables the precise measurement of samples having sharp cutoff characteristics. It quantifies color, APHA, achromaticity, whiteness and yellowness of a wide range of chemical products. UltraScan PRO is designed to be your reference instrument.

Stainless Steel Pickling Gel

Achieve maximum corrosion resistance to stainless steel. Surface contamination may drastically reduce the life of stainless steel. Wonder Gel removes (pickles) stubborn impurities, toughest scale, slag and heat discoloration and restores the protective chromium oxide layer (passivation).
