Designed to monitor high, intermediate or low point-level detection on dry bulk solids as well as liquids or slurries, the **Dynatrol®** Level Detectors are available in corrosion-resistant coatings. The compact, rugged detectors are built in the USA and are solidly constructed for a long operating life. They have no moving parts, require no adjustments and are virtually wear-free – delivering a worry-free solution for your demanding service conditions.

*Request your copy of the latest **Dynatrol®** catalog - on CD!*

Covers the complete **Dynatrol®** line of level switches & detectors, on-stream process analyzers, measurement & control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.

Cutting-Edge Capital Project Management & Cost Control

A one day seminar introducing cutting-edge capital project management and cost control techniques, techniques endorsed by the Project Management Institute and the American Association of Cost Engineering, adapted to our industry. No note taking necessary. A take-home CD will contain files and spreadsheets which will cover all discussed and do the following:

- (1) **Project Planning:** Calculates project schedule, concept through startup, based on input project cost estimate (conceptual through detailed) and project type.
- (2) **FCI given ROI:** Calculates the fixed capital investment that satisfies input project economic criteria.
- (3) **Definition Rating & Earned Value:** Accurately predict final project cost at any point in the project. Identify overruns early.
- (4) **Project Plans:** for a small, medium, large, and very large project, in accordance with the PMBOK, the ANSI standard on project management, adapted to our industry.
- (5) **Engineering Scopes of Work (SOW):** Get better, more economical engineering through hard money bids: Preliminary Engineering SOW, Detailed Engineering SOW, Design / Build SOW.

Cost: \$599 per person
Location: Joliet, IL **Date:** August 7, 2009.

VMGSim™
Integrated Steady State and Dynamic Simulation.

Easily create process models of refining, chemical and oil/gas processing to troubleshoot, design or optimize your plant. Create steady state models, size and rate vessels, columns and heat exchangers. Add your control system to the model and click a button to run dynamically. Use the dynamic wizards to create and run dynamic depressuring and blowdown studies and model multistage compressors and antisurge control. Create custom unit operations and economic models embedded in your process model by dragging the Excel operation onto your PFD. Graphical User interface driven by embedded Visio. Completely Interactive, bidirectional simulation solver.

WORLD LEADER IN NUCLEAR AND CHEMICAL PROCESS SAFETY

We provide consulting service, contract testing and software including:

FATE 2.0™ is used for design, safety, and D&D analyses of nuclear and chemical facilities.

FRST Fire Scoping Model is a productivity tool that automates fire PRA Task 6, Fire Ignition Frequencies, and Task 8 Scoping Fire Modeling.

The **MAAP5** code assesses the approach to, and progression of severe accidents in BWRs and PWRs operated in the western hemisphere and extends these to plant specific features presently represented in state-of-the-art models for PRAs/PSAs, SAMGs, EOPs, and full scope control room simulators.

RMS (Reactivity Management Software) allows users to quickly and easily design safety systems that accommodate abnormal runaway chemical reactions and determine the necessary relief-venting requirements.

XYPlot2-Pro is an easy to use, flexible tool for analyzing data and is fully compatible with all types of data files. It graphically displays data from other computer software programs, instruments or processes.

Contact us for all your safety needs at 1-877- FAUSKE 1 or info@fauske.com.

Free COMSOL Conference CD

COMSOL®, Inc. is now offering a free copy of the 2009 Edition of the COMSOL Conference CD. It is packed with over 275 presentations from our recent conferences in Boston and Hannover. Included are presentations with slides, papers, videos and more. Applications featured include microfluidics, electrochemistry, transport phenomena, reaction engineering, and many more.

Request your complimentary copy of the CD at www.comsol.com. Tel: 781-273-3322

The Proceedings of the 2008 AIChE Annual Meeting are now available for purchase. This CD-ROM contains more than 800 technical papers and abstracts. Organized in an easy-to-use and fully searchable format, the proceedings cover more than 770 technical sessions and 17 topical conferences. The cost for individual use is \$130 plus shipping. These proceedings, as well as other AIChE conference proceedings, can be purchased online at <http://shop.omnipress.com> or by calling Omnipress at 800-828-0305 or 608-246-2600 (international callers) or faxing 608-246-4237.
