

## Turn words into action

The new HSC Chemistry® 7 may be used to minimize waste materials with the recycling and maximize efficiencies with the optimal process flowsheet. The result is sustainable industrial ecosystem where the economic, environmental, and social dimensions are in balance.

## Cutting-Edge Capital Project Management & Cost Control

A one day seminar introducing cutting-edge capital project management and cost control techniques, techniques endorsed by the Project Management Institute (PMI) and the American Association of Cost Engineers (AACE), adapted to our industry. No note taking necessary. A take-home CD will contain software which will cover all discussed and do the following (and more):

**(1) Calculate Project Risk and Recommend Target ROI**

**(2) Economic Analysis:** Calculates ROI, IRR, and Payback for new processes, process upgrades, and equipment replacement.

**(3) Project Plans:** for a small, medium, large, and very large project, accommodating any project, in accordance with the PMBOK, the ANSI standard on project management, written by the PMI, adapted to our industry.

**(4) Project Scheduling:** Calculates project schedule, concept through startup, based on input project cost estimate (conceptual through detailed) and project type.

**(5) Engineering Scopes of Work (SOW):** Get better, more economical engineering through hard money bids: Process Design SOW, Detailed Engineering SOW, Design / Build SOW.

**(6) Definition Rating & Earned Value:** Accurately predict final project cost at any point in the project. Identify overruns early enough to do something about them.

**Cost:** \$599 per person **Location:** Joliet, IL  
**Date:** 4/30/10.

**Information and Registration:**

## VMGSim™ Integrated Steady State and Dynamic Simulation.

Easily create process models of refining, chemical and oil/gas processing to troubleshoot, design or optimize your plant. Create steady state models, size and rate vessels, columns and heat exchangers. Add your control system to the model and click a button to run dynamically. Use the dynamic wizards to create and run dynamic depressuring and blowdown studies and model multistage compressors and antisurge control. Create custom unit operations and economic models embedded in your process model by dragging the Excel operation onto your PFD. Graphical User interface driven by embedded Visio. Completely Interactive, bidirectional simulation solver.

## Free COMSOL Conference CD

COMSOL® is now offering a free copy of the 2010 Edition of the Conference CD! This CD is a well rounded compilation of works from the worldwide multiphysics simulation community. It contains over 400 slideshows from our recent conferences in Boston, Milan and Bangalore. Applications featured include microfluidics, electro-chemistry, transport phenomena, reaction engineering, and many more.

Request your complimentary copy of the CD at [www.comsol.com](http://www.comsol.com). Tel: 781-273-3322

Designed to monitor high, intermediate or low point-level detection on dry bulk solids as well as liquids or slurries, the Dynatrol® Level Detectors are available in corrosion-resistant coatings. The compact, rugged detectors are built in the USA and are solidly constructed for a long operating life. They have no moving parts, require no adjustments and are virtually wear-free – delivering a worry-free solution for your demanding service conditions.

Request your copy of the latest Dynatrol® catalog - on CD!

Covers the complete Dynatrol® line of level switches & detectors, on-stream process analyzers, measurement & control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.
