

### MIXING SYSTEMS BROCHURE

The brochure describes Pulsair's mixing systems that release sequential pulses of air or gas to mix tank contents. Systems are adaptable from a single 55-gallon drum to multiple 1 million gallon tanks and can be managed from a central control unit. Pulsair mixers are currently in use worldwide in the petroleum, lubricant, wastewater, food and wine industries.

### NO MORE GUESSING! MEASURE COLOR FOR OPTIMAL QUALITY.

The UltraScan VIS spectrophotometer objectively quantifies slight lot differences in yellowness and color for clear and chromatic chemicals. (Dry or liquid, hot or cold, large or very, very small samples.) Generate an electronic record of the test results. ### DYNATROL® LEVEL DETECTOR SWITCHES

The G-Series suits extremely light powders or bulk solids that pack and bridge easily. Request your copy of the latest Dynatrol® catalog - on CD! Covers the complete Dynatrol® line of level switches and detectors, on-stream process analyzers, measurement and control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.

## Uninterrupted Access to Bulk Rail and Trucks

Adjust height levels hydraulically or manually with HEMCO ramps. Available up to 30 feet long, they allow easy access to the tops of bulk trucks and hopper cars.

### NEW PROMOTIONAL LITERATURE?

Get the word out via Ad Lits in Chemical Engineering Progress. CEP Ad Lits appear in February, April, June, August, October and December. Book your schedule now and receive a discount with frequency. Bonus: Your Ad Lit will also appear in the digital edition with a free hyperlink back to your website. Ad Lits are a great way to promote your catalogs, brochures and spec sheets in print and online.

### "GUIDELINES FOR PROCESS SAFETY METRICS"

In 2008, AIChE's Center for Chemical Process Safety (CCPS) issued a recommended set of lagging metrics that companies around the world could use to monitor and benchmark process safety results on a consistent basis. The lagging metrics were supplemented with a broad set of leading metrics to help companies monitor key aspects of their process safety programs. An online tool that companies can use to voluntarily report and benchmark their global performance is also available on the CCPS website, allowing manufacturing companies to compare their performance regarding number of process safety incidents, process safety incident rate, and process safety severity rate on a global, national, and regional basis. Now, CCPS and John Wiley and Sons are pleased to announce the recent publication of the new book, "Guidelines for Process Safety Metrics."
