

Design Flow Solutions®

DF Branch | DF DesignNet

Design Flow Solutions is the most comprehensive, cost effective engineering aid available for complete hydraulic analysis of complex piping systems.

This powerful software package provides engineers with:

- Complete hydraulic analysis of complex piping,
- Effective solutions to fluid flow problems,
- Fast, reliable reference information.

See our website for more information and to download a free evaluation copy:

Traveling Gangway Fits Any Car or Truck

Track mounted gangway can be moved back and forth along the elevated track and extended as necessary to provide safe and easy access or egress from the vehicle no matter what the spotting or configuration.

THINK GREEN—THINK PULSAIR

Pulsair Chemical and Wastewater Mixing Systems efficiently mix aeration tanks, anoxic basins, sludge tanks, and chemical tanks using up to **75% Less Energy** than conventional mechanical mixers...and there are no immersed impellers, shafts, gears, seals or any other moving parts in the tank.

PULSAIR

The Fastest, Most Efficient Low Shear Mixing System Available Today!

For information on the Pulsair Automated Mixing System best for your application, Call **800-582-7797** Email sales@pulsair.com

Free Tutorial CD Featuring Fluid Flow, Heat and Mass Transfer, and Reaction Kinetics

COMSOL® is now offering a free copy of the 2011 Edition of the Conference CD! This CD is a well rounded compilation of works from the worldwide multiphysics simulation community. It contains over 500 presentations from our recent conferences in Boston, Paris and Bangalore. Applications featured include microfluidics, electrochemistry, transport phenomena, reaction engineering, and many more.

Request your complimentary copy of the CD at www.comsol.com/cep-showcase

FAUSKE & ASSOCIATES, LLC

WORLD LEADER IN NUCLEAR AND CHEMICAL PROCESS SAFETY

FAI: Expanded Dust Testing Capabilities and New Pricing!

Fauske & Associates, LLC, World Leader in Nuclear & Chemical Process Safety, announces new laboratory capabilities with the expansion of state-of-the art equipment and space yielding quicker test turnaround times. FAI exceeds dust flammability and explosivity safety standards.

Call today for all your process safety needs!

Designed to monitor high, intermediate or low point-level detection on dry bulk solids as well as liquids or slurries, the **Dynatrol®** Level Detectors are available in corrosion-resistant coatings. The compact, rugged detectors are built in the USA and are solidly constructed for a long operating life. They have no moving parts, require no adjustments and are virtually wear-free – delivering a worry-free solution for your demanding service conditions.

Request your copy of the latest **Dynatrol®** catalog - on CD!

Covers the complete **Dynatrol®** line of level switches & detectors, on-stream process analyzers, measurement & control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.

New Clean Energy Guide Radically Expands Environmental Flow Measurement Solutions

The 40-page Sierra Clean Energy Guide offers engineers, scientists, plant managers, and designers alike an up-close look at how Sierra is partnering with customers from all over the world to develop sustainable solutions

to some of today's most pressing environmental problems. From high performance flow measurement tools that help create biofuel from solid wastes to unlocking the carbon history in Antarctic ice to determine how much CO₂ the ocean can digest, the Sierra Clean Energy Guide details a broad range of problem/solution scenarios. In addition, the guide explores how water and energy conservation efforts are met using the Model 205 clamp-on, non-intrusive ultrasonic flow meter designed to measure thermal energy flow rate and totalized energy consumption in liquid heating and cooling applications.
