

Multitubular reactor scale-up and design

- Design of multitubular fixed-bed catalytic reactors
- Scale-up from bench to pilot and commercial
- Gas or liquid phase
- Tube-side design (number, dimensions)
- Shell-side design (baffle configuration, tube pitch, coolant flow)
- Catalyst layer optimization
- Impact of catalyst shape, size, internal structure
- Hot spot management
- Kinetics identification, catalyst deactivation
- Advice on design of experimental programs

Dynatrol®

Toll free 800.231.2062 Phone 713.869.0361 Fax 713.869.7332

Designed to monitor high, intermediate or low point-level detection on dry bulk solids as well as liquids or slurries, the **Dynatrol®** Level Detectors are available in corrosion-resistant coatings. The compact, rugged detectors are built in the USA and are solidly constructed for a long operating life. They have no moving parts, require no adjustments and are virtually wear-free – delivering a worry-free solution for your demanding service conditions.

Request your copy of the latest Dynatrol® catalog - on CD!

Covers the complete **Dynatrol®** line of level switches & detectors, on-stream process analyzers, measurement & control instruments and a new line of accessories. Includes detailed drawings, wiring diagrams, and examples of proven uses.

THINK GREEN—THINK PULSAIR

Pulsair Chemical and Wastewater Mixing Systems efficiently mix aeration tanks, anoxic basins, sludge tanks, and chemical tanks using up to **75% Less Energy** than conventional mechanical mixers...and there are no immersed impellers, shafts, gears, seals or any other moving parts in the tank.

PULSAIR
The Fastest, Most Efficient Low Shear Mixing System Available Today!

For information on the Pulsair Automated Mixing System best for your application,

Free Tutorial CD Featuring Fluid Flow, Heat and Mass Transfer, and Reaction Kinetics

COMSOL® is now offering a free copy of the 2011 Edition of the Conference CD! This CD is a well rounded compilation of works from the worldwide multiphysics simulation community. It contains over 500 presentations from our recent conferences in Boston, Paris and Bangalore. Applications featured include microfluidics, electrochemistry, transport phenomena, reaction engineering, and many more.

Request your complimentary copy of the CD at www.comsol.com/cep-showcase

The Proceedings of the 2011 AIChE Spring Meeting and 7th Global Congress on Process Safety are now available online, as individual papers, or as a CD-ROM by going to www.aicheproceedings.org. The proceedings include over 660 abstracts and extended abstracts. Past proceedings are also available. You may order CD-ROMs by calling Omnipress at 1-800-828-0305 or 608-246-2600 (international callers).

New Clean Energy Guide Radically Expands Environmental Flow Measurement Solutions

The 40-page Sierra Clean Energy Guide offers engineers, scientists, plant managers, and designers alike an up-close look at how Sierra is partnering with customers from all over the world to develop sustainable solutions

to some of today's most pressing environmental problems. From high performance flow measurement tools that help create biofuel from solid wastes to unlocking the carbon history in Antarctic ice to determine how much CO₂ the ocean can digest, the Sierra Clean Energy Guide details a broad range of problem/solution scenarios. In addition, the guide explores how water and energy conservation efforts are met using the Model 205 clamp-on, non-intrusive ultrasonic flow meter designed to measure thermal energy flow rate and totalized energy consumption in liquid heating and cooling applications. International Congress on Energy: Sustaining Supplies

October 16-21, 2011

Minneapolis Convention Center, Minneapolis, MN

Meeting the world's growing energy demands has never been a more pressing concern.

Attend the one conference where like-minded industry experts and engineers review best practices for ensuring a clean, sustainable and affordable energy supply for the future.

Now in its second year, the 2011 International Congress on Energy will feature more than 100 sessions related to technology, markets, business strategies and policy covering the solar, nuclear, lignocellulosics, biorefineries, hydrogen production, hydrogen storage and green innovation energy sectors.

Compare existing energy supply options. Explore the latest technologies. And gain new perspectives about issues that will impact our lives, industries, environment and society.

This year's congress topicals are organized into multiple concurrent sessions in the following areas:

- + Global Solar and Nuclear Energy in the 21st Century
- + Lignocellulosics: Biorefineries and Sustainable Energy
- + Hydrogen Production and Storage
- + Innovations of Green Process Engineering for Sustainable Energy and Environment

For more information on the 2011 International Congress on Energy and to register visit <http://www.energycongress.org/>.
