Build your Process Safety Knowledge with CCPS Courses from AIChE Academy

Upcoming CCPS Public Courses

- Process Safety Boot Camp
October 5 – 8, 2015 • Seattle, WA
- HAZOP Studies/Advanced PHA Concepts Combo Course
October 5 – 9, 2015 • Houston, TX
- Process Safety Boot Camp
October 26 – 29, 2015 • Houston, TX
- HAZOP Studies/Advanced PHA Concepts Combo Course
December 7 – 11, 2015 • New York, NY

Intelligen Suite®

The Market-Leading Engineering Suite for Modeling, Evaluation, Scheduling, and Debottlenecking of Multi-Product Facilities

SuperPro®

Use SuperPro Designer to model, evaluate, and optimize batch and continuous processes

SchedulePro®

Migrate to SchedulePro to model, schedule, and debottleneck multi-product facilities

Easy production tracking, conflict resolution and rescheduling

Tracking demand for resources (e.g., labor, materials, utilities, etc.)

Managing inventories for input, intermediate, and output materials

SuperPro Designer is a comprehensive process simulator that facilitates modeling, cost analysis, debottlenecking, cycle time reduction, and environmental impact assessment of integrated biochemical, bio-fuel, fine chemical, pharmaceutical (bulk & fine), food, consumer product, mineral processing, water purification, wastewater treatment, and related processes. Its development was initiated at the Massachusetts Institute of Technology (MIT). SuperPro is already in use at more than 500 companies and 900 universities around the globe (including 18 of the top 20 pharmaceutical companies and 9 of the top 10 biopharmaceutical companies).

SchedulePro is a versatile production planning, scheduling, and resource management tool. It generates feasible production schedules for multi-product facilities that do not violate constraints related to the limited availability of equipment, labor, utilities, and inventories of materials. It can be used in conjunction with SuperPro (by importing its recipes) or independently (by creating recipes directly in SchedulePro). Any industry that manufactures multiple products by sharing production lines and resources can benefit from the use of SchedulePro. Engineering companies use it as a modeling tool to size shared utilities, determine equipment requirements, reduce cycle times, and debottleneck facilities.
