Message from the Chair

A warm welcome to all fellow WSCAIChE members, professionals, and friends! It is my pleasure to serve our local section as the Chair for 2016-2017. Previously, I served as the webmaster, and most recently as the treasurer for two years. The officers have put together a strong program of meetings and tours as we continue the WSC local section's long tradition of providing opportunities for learning, networking, and professional development.

Please welcome Marty Milne to our "WSCAIChE Officer Family." Marty was a speaker on job recruitment during our September 2015 meeting, and has stepped up to join AIChE and serve as the Vice Chair for 2016-2017. The other officers will no doubt be familiar to long-time members of the local section; Rick Vogel is serving as treasurer, David Hine is again the Historian, and Mary Ferris will be moving to "Vice Chair" on the executive committee along with Don Gurney and Karl McCaleb. These folks, among others, have been integral to keeping the organization running year after year.

Our section continues its partnership with the Clemson University AIChE section, including the traditional Fall/Spring joint meetings with Clemson ChBE students and faculty. We will again award a \$1000 scholarship to a deserving rising Senior in the ChBE major. Last year, we also provided a \$500 sponsorship of the Clemson AIChE pig roast.

We will be meeting at several venues this year, so take a look at the schedule below for details. If ever you have ideas about meeting topics, local section activities, or want to help out, please contact one of the officers - we want to run the best possible local section for us all, and look forward to the upcoming year!

Jacob Lindler - Chair, WSCAIChE

NEXT MEETING - September 13, 2016

Why Projects Fail

Trends reported by industry suggest capital project delivery is sub-par and not improving, despite an intensive focus on execution. Fewer projects meet original goals, business intent, or within budget. In the United States alone, this less than optimal performance costs organizations billions of dollars of wasted capital. We will review the disappointing data, see the common factors that challenge project performance, and discuss some of the best practices to promote successful project delivery.

Mr. John Brady has been immersed in the process industry for the past 30 years. He is a Clemson University Chemical Engineering graduate and registered professional engineer. He is a proven business leader, with a unique combination of business acumen, technical ability, and leadership skills. Mr. Brady successfully developed, optimized, and executed business strategies for multiple businesses. For the past decade, Mr. Brady has been engaged in various roles in the Engineering and Construction industry. He is currently Vice President of Business Development at CH2M, responsible for global business development for the Chemicals and Manufacturing markets.
