October 6th, 2013

Dear Rocky Mountain AIChE'ers,

It has been sometime since Rocky Mountain (RM) local section has had a membership chair, but finally after recruiting some new leadership blood, all of our positions are filled and I have the opportunity to greet you in this role. I am writing to you today to request your support for our local section in two ways; local membership and by championing opportunity.

LOCAL MEMBERSHIP

For those of you that receive our newsletters and are not already members, I encourage you to join the local section. Rocky Mountain section membership dues are only \$15 a year. These funds allow us to promote the profession at the local level through monthly meetings and support of additional activities.

CHAMPIONING OPPORTUNITY

We would like to continue to provide support of new and extended membership initiatives. We currently support the Colorado State Science Fair¹ and have awarded funds to regional students-chapters primarily for travel to regional meetings. However, continuing and building these initiatives will depend largely on membership and member support via donations. So I am asking for your additional championship and support of these initiatives.

With additional support, please keep an eye out for the initiatives. Ideas include; establishing a scholarship fund, establishing an annual YP get together, and funding outreach efforts to support promotion of membership. As recognition of your support we will build acknowledgement into our local section materials (website and newsletter).

For convenience, additional support can be sent directly to our new treasurer Crystal Smalley:

Merrick & Company
5970 Greenwood Plaza Blvd.
Greenwood Village, Colorado 80111

Thank you kindly for your support of the Rocky Mountain chemical engineering community. Please contact me with any questions, if you would like to learn more about membership initiatives or if you have suggestions.

Sincerely,

Cory D. Jensen
