

### April Section Meeting: Film Viewing – NOVA “Power and Surge”

We are co-sponsoring a screening of the NOVA documentary "Power Surge" followed by a panel discussion, with the [Colorado Environmental Management Society \(CEMS\)](#). Come and meet the engineering, scientific, legal, and regulatory professionals of CEMS and learn about the current technological and political state of clean energy.

#### About “Power Surge”

Can emerging technology defeat global warming? Are we finally on the brink of a green-energy "power surge," or is it all a case of too little, too late?

From solar panel factories in China to a carbon capture-and-storage facility in the Sahara desert to massive wind and solar installations in the United States, NOVA travels the globe to reveal the surprising technologies that just might turn back the clock on climate change. NOVA will focus on the latest and greatest innovations, including everything from artificial trees to green reboots of familiar technologies like coal and nuclear energy. Can our technology, which helped create this problem, now solve it?

#### Panelists:

- K.K. DuVivier, Professor of Energy, Mining, and Renewable Energy Law at the University of Denver
- Ron Miller, Energy Industry Consultant with Reliant Energy Solutions / Reliant Midstream
- Kathleen Staks, Executive Director of the Colorado Energy Office
