

Sponsorship Information
2022 AIChE Midwest Regional Conference
(Virtual)
March 1-2, 2022

<https://www.aiche.org/conferences/midwest-regional-conference/2022>

The 14th Annual AIChE Midwest Regional Conference (MRC) will be virtually on March 1-2, 2022. Organized by the [Chicago Local Section](#), MRC provides an opportunity for engineers and scientists in the region to learn about new technologies and network with others.

Each year, the conference is made possible by generous contributions from corporate sponsors. Sponsorship encourages attendance and participation at the conference, improving the event for both sponsors and attendees. Please see the attached sponsorship levels to determine how your company can get involved with MRC and for specific benefits of sponsorship.

In addition to the technical programming, MRC is proud to continue hosting the High School Student Engineering Career Outreach Program. Through this program, Chicago-area high school students become acquainted with various facets of the engineering professions. Traditionally, this program was held in-person in conjunction with the conference and included a lunch where students were seated with practicing engineers. The outreach program will be held virtually 2022, but we hope to return to an in-person event for future meetings. An Exclusive Sponsorship Opportunity of the High School Student Engineering Career Outreach Program this year will support paying for the virtual platform (separate from the conference virtual platform) and student prizes to encourage participation.

The 2022 MRC is planning to feature technical sessions on topics including:

- | | |
|--|---|
| ○ Refining & Biorefining Technology | ○ Green Engineering & Climate Solutions |
| ○ Bioengineering & Nanotechnologies | ○ Machine Learning & Optimization |
| ○ Catalysis & Reaction Engineering | ○ Polymer Science |
| ○ Energy Storage | ○ Process Safety & Occupational Health |
| ○ Environmental Compliance/Remediation | ○ Fluid Properties & Dynamics |

Plus other Emerging Topics in Chemical Engineering
