**“Apply *Can’t* Rather than *Don’t* to your Process”**

Scheduled Speaker:

**Peter Sibilski, PE, FAIChE, CEM**

Many safety systems rely on human intervention to prevent accidents. A different approach is to make it impossible for a catastrophic accident to occur in the first place. At this meeting, learn how to implement the *Can’t Rather Than Don’t* principle at your facility.

Peter Sibilski has over 30 years of experience in project management, product development, and energy management in the process-chemical and pharmaceuticals industries. He has led diverse, cross-functional teams in achieving business-driven goals for projects of significant dollar value. Peter has a proven track-record of successful and award-winning product development and project implementation providing significant cost savings, increased operational efficiencies, and enhanced competitive position. He received his BSChE in 1981 from New Jersey Institute of Technology, and has an MBA – Technology Management from The University of Phoenix. Peter is a licensed PE in New Jersey, a Fellow of AIChE, and a Certified Energy Manager (CEM).

**“Sustainability Trends in the Chemical Industry”**

Scheduled Speaker:

**Darlene Schuster, PhD - Executive Director  
AIChE Institute for Sustainability**

Sustainability continues to be a major driving force for innovation in the chemical industry. It also plays a role in companies' economic and social decision making. However, sustainability is difficult to quantify because there are so many ways to define it. The AIChE Sustainability Index® provides benchmarks of a company's performance on a variety of metrics including those related to corporate social responsibility. This presentation will provide attendees with an overview of this useful metric.

Darlene Schuster is the Executive Director of the Institute for Sustainability, an AIChE Technological Community, where she oversees the industry, membership and youth-focused entities which advance the science and state of sustainability. She also directs the new AIChE Center for Energy Initiatives, Society for Biological Engineering, and the International Society for Water Solutions.

Dr. Schuster held the Clare Boothe Luce Chair of Chemical Engineering at Bucknell University, and held various engineering positions with Gulf Oil Production Research and Chevron Oil Field Research Company. She was an ACS Science Policy Fellow, received the Technical Achievement Award from the Central Pennsylvania Engineers Council in part for contributions to novel technology product development and commercialization by her company, DP Group. Dr. Schuster holds a BSChE (WVU), MSChE (University of Pittsburgh), and PhD. (West Virginia University).
