## Robert Stevens

We are sad to inform you that our Director Bob Stevens passed away earlier this month. He was very active and supportive of our local section, presenting to our section on multiple occasions and adding humor to our holiday parties with his unique outfits. He was an AIChE member for 43 years. Bob will be greatly missed!

Bob was a retired executive from Bechtel Corporation, with over 12 years of experience in many types of projects while working there. He worked around the world (every continent except Antarctica) on projects in the areas of oil, gas, chemicals, LNG, fossil and nuclear power, and environmental cleanup. He had an extensive career spanning several decades.

Bob had a B.S. in chemical engineering from Missouri University of Science and Technology (1980) and later completed an M.S. in engineering management (1985) from the same institution. He was passionate about helping and contributing to his alma mater, having served as President of the Academy of Chemical Engineers at the university, Chair of the Distance Learning Committee, and member of the Chemical Engineering Advisory Board. He will be greatly missed

as well by his alma mater due to all his generous contributions and involvement.

---

## Summary of Bob Stevens' professional career

Bob's career began as a process design engineer at The Pritchard Corporation from 1981 to 1983. He then transitioned to Procter & Gamble, where he served as a process engineer from 1986 to 1987, before advancing to the role of technology manager from 1987 to 1990. His tenure at Procter & Gamble was marked by notable achievements, including receiving the Stan Adams Reliability Award in the Paper Division in 1990.

In 1990, Bob embarked on a distinguished journey with Bechtel Corporation, where he held various positions of increasing responsibility and leadership. From 1990 to 1999, he transitioned from project engineering manager to site manager, overseeing critical projects and demonstrating exceptional managerial skills. His contributions were recognized with the President's Award for Team Excellence from Shell Oil Co. in 1994. Continuing his career trajectory, Bob assumed the role of engineering manager in Mexico from 1999 to 2000, followed by a brief stint as a project manager from 2000 to 2001. He then served as a resident engineering manager in Egypt in 2001, before his tenure culminated in his role as an

engineering executive, where he served from 2002 until his retirement in 2016.
