

The John J. McKetta ProjectConnect Grants for Local Sections – Application

The John J. McKetta ProjectConnect Program was created to assist local sections in reaching out to recent chemical engineering graduates and students. In this program, 15-25 annual grants of \$150 - \$600 each are awarded to sections submitting qualified applications. Sections awarded a grant will receive a check along with a summary report that is to be completed and returned to AIChE. Sections that do not submit this summary report will be ineligible for a grant in the following year. Only one grant per section may be given in a programming year. Questions should be directed to AIChE's Membership Department at (646) 495-1331 or localsections@aiche.org.

Proposals are judged on the following criteria: mass appeal, innovative program content, and relevance to young professionals.

General Information:

Name: _____

Local Section: _____

Phone: _____ Email: _____

Program Summary (Describe the program in 150 words or less including the scheduled date of event):

How will the event increase the participation of young graduates and students?

List the names of other AIChE groups, sections or other professional societies that are co-hosting the event.

What is the total estimated cost of the event?
