

The International Conference on CRISPR Technologies brings together leaders and trainees from the cutting edge of CRISPR technologies and their application to genome editing and beyond. Academic, clinical, and industrial researchers are invited to share their recent discoveries to progress the field in CRISPR science and engineering.

SESSION TOPICS

- CRISPR-Cas Biology
- Genome Editing and DNA Repair
- Clinical and Biomedical Applications of CRISPR
- Agricultural and Ecological Applications of CRISPR
- Industrial Biotechnology Applications of CRISPR
- Delivery and Specificity of CRISPR-based Tools
- Social, Ethical, and Economic Implications of CRISP
