

International Conference **MICROBIOME ENGINEERING**

December 2-4, 2019
Joseph B. Martin Conference Center
Boston, MA

Participate in the **International Conference on Microbiome Engineering (ICME 2019)** – an event that brings together experts from industry and academia worldwide to discuss the challenges in microbiome engineering and the future of related fields.

Session topics include:

- Emerging technologies to manipulate and study microbiomes
- Computational modeling to predict and understand microbiomes
- Engineering of organisms and communities for plants, animals and bioremediation
- Engineering therapeutic microbes for clinical applications
- Challenges in microbiome engineering: spanning distinct areas of expertise [Panel Discussion]

Submit an abstract, register and learn more about ICME 2019

KEYNOTE SPEAKER

Wenyuan Shi

Forsyth Institute

Christopher Voigt

Massachusetts Institute of Technology

CONFERENCE CHAIRS

Rachel Haurwitz

Caribou Biosciences, Inc.

Ophelia Venturelli

University of Wisconsin-Madison

ORGANIZING COMMITTEE

Nitin Baliga

Institute of Systems Biology

Stephanie Culler

Persephone Biome

Kevin R. Foster

University of Oxford

Yang-Yu Liu

Harvard University

Costas Maranas

Pennsylvania State University

Bernat Olle

Vedanta Biosciences

Michelle O'Malley

University of California

Santa Barbara

Pamela Silver

Harvard University

Harris Wang

Columbia University
