National Diversity Equity Workshop for
Chemical Engineering Academic Leaders

Powered by OXIDE

June 28-30, 2020 | Baltimore Marriott Waterfront | Baltimore, MD

The National Diversity Equity Workshop for Chemical Engineering Academic Leaders will assemble department chairs and heads to work together to improve our culture toward inclusive excellence. The centerpiece of the workshop is a series of breakout sessions to develop solutions collaboratively.

The goals of the workshop are: **(1)** to learn effective practices as identified by the research community and as employed in other disciplines, **(2)** to hear first-hand experiences from chemical engineering pioneers about barriers and challenges to inclusive excellence, **(3)** to share experiences in improving diversity, equity and inclusion in chemical engineering departments, and **(4)** to work together as a community to improve inclusion in our discipline.

Each Chemical Engineering Department may apply for a travel stipend and registration for their Department Chair to attend; a limited number are available on a first come first serve basis. Contact Keith Joseph at keitj@aiche.org by **February 1, 2020** if your department is interested in the stipend.

Interested in exhibiting and/or sponsoring at this event? Contact sales@aiche.org

FEATURED SPEAKERS

Gilda Barabino, *City College of New York*
Rigoberto Hernandez, *Johns Hopkins University*
Cato Laurencin, *University of Connecticut*
