

BEING AN ENGINEER – Creating a World That Works

A High School Outreach Event

Tuesday, April 28 9am - 1pm

The University of Texas at Austin

AVAYA Auditorium

This free event will expose high school students to chemical engineering (ChE). Students will hear about what engineers do, how engineering improves society and how to pursue a career in engineering.

(512) 471-3263

This event is supported by the Fuels and Petrochemicals Division of the American Institute of Chemical Engineers (AIChE).

Program Outline

- Talk by Astronaut Al Sacco, the first ChE professor in outer space
- Intro to engineering
- How ChE changes the world
- Panel discussion with engineers, engineering students and faculty
- How Engineers Touch the World
- Lunch with engineers
- Campus tour (optional)

Registration is required to attend. Space is limited and available on a first-come first-serve basis.
