

Fluidization XVII

Sponsorship Opportunities

May 21-25, 2013 • Edinburg, Scotland
Sheraton Grand Hotel and Spa

Fluidization is an important field of both fundamental research and broad industrial applications. Current understanding of the complex fluid-particle multiphase flow patterns, coupled with heat and mass transfer and chemical reactions, is still incomplete.

With a long established tradition, this series of conferences has been held all over the world tackling challenges and successes with the design and operation of fluidized beds and similar fluid-particle systems. This newest session will continue to play this role and stimulate the interplay between the academic, engineering and industrial communities to address the challenges for the future of fluidization technology.
