

Shakeel Kadri:
Executive Director, CCPS
American Institute of Chemical Engineers (AIChE)
Center for Chemical Process Safety (CCPS)
New York, USA

Shakeel is a renowned global leader in Process Safety. He became the Executive Director of the Center of Chemical Process Safety in 2015. During the last two plus years at CCPS, Shakeel has focused his effort in advancing the CCPS mission globally and in particular put a major emphasis on improving “Responsible Collaboration” with CCPS’ key stakeholders globally. Shakeel came to this role after spending 36 years with Air Products and Chemicals. His last role there was the Director of Global Process Safety and Risk Management. In this role, Shakeel was globally involved with various industry activities with a focus on risk-based process safety, process safety metrics and performance improvement and helping to build and sustain a strong process safety culture. He is a strong proponent of process safety measurement and achieving improvements. At Air Products, he championed the Process Safety metrics effort and achieved a global leadership commitment on this initiative. He has been engaged in industry’s process safety metrics development and deployment effort since 2002 and involved in the CCPS and API-754 metrics efforts since their inception. Shakeel has a BS and MS in Chemical Engineering and an MBA in Finance. He is a Fellow of AIChE and CCPS.
