

# Pharma, Food and Fine Chemicals (PFFC)

*A Subgroup of the Center for Chemical Process Safety (CCPS)*

**Join us for a virtual meeting in 2022**

Formed to serve our members who have very specific or volume related issues to our industry, the purpose of the *Pharma, Food and Fine Chemicals (PFFC)* subgroup is to ensure that process safety in pharmaceutical and small batch operations is executed to the correct degree and sharing best practices.

## Topics for all industry types:

- Open System Chemical Operations
- Hierarchy of requirements e.g. standards, regulations, internal procedures
- Understanding combustible dust hazards and risk assessments
- PHA
- MOC
- Burner management including fuel storage systems
- Process safety organization structure (e.g. resources, governance)
- Process safety incidents update

Visit [aiche.org/ccps](https://www.aiche.org/ccps) for more information about PFFC today.

This presentation is a general overview of legal, regulatory, and related practices that influence process safety management. It does NOT constitute legal advice. For specific situations, consult an attorney.

Categories covered are in approximate order of legal strength (i.e., ability to cite, fine and prosecute a company or individuals within a company).

The emphasis of this presentation is on US regulation but has general applicability worldwide. Japan, China, the EU and other jurisdictions and regions may have different interpretations into what is applicable in their localities.
