DOING
A WORLD
OF GOOD

A World of Doing More Good

In six years since its launch, the Doing a World of Good campaign has raised over \$27 million to support programs that continue to push the boundaries of engineering - thanks to the generosity of individual supporters and corporate partners.

In 2020, we were pleased to announce the launch of the Future of STEM Scholars Initiative (FOSSI).

Campaign Impact

Safety and Ethical Practice

182,615

Safety Certificates awarded to students worldwide

51,174

Students completed SACHÉ modules worldwide

657

New Faculty Members educated on process safety at industry workshops

673

Universities participating in Undergraduate Process Safety Learning Initiative (UPSLI) curriculum

Attracting the Best and the Brightest

247

Scholarships awarded to underrepresented students

64

International Student Members participated in the Annual AIChE Student Conference

Education and Career Development

6,124

Members of the AIChE K-12 Community

423

Members joined the AIChE Online Community for Process Engineers

Research and Innovation

2,801

Individuals trained in process intensification

62

Undergraduate students participated in RAPID's internship program

Changing Perceptions

9,983

Listeners tuned in to the Doing a World of Good Raj and Kamla Gupta Podcast

188,767
