The Call for Abstracts for the 2024 DIERS Fall Meeting is now open. Abstracts are required for all presenters. Please submit abstracts as soon as possible, but no later than August 16, 2024.

The focal topic for this DIERS meeting is: "High Energy Materials". Potential presentations on this topic include discussions on experimental methods, modeling techniques, and case studies for explosives, deflagration risks, and electrostatic charge, shock and friction sensitive material.

In addition, DIERS welcomes presentations on any subject pertaining to runaway reaction, equipment overpressure, and pressure relief. See the accompanying list for more elaboration.

Please submit your abstract to following:

Harold Fisher: (775) 297-3117; fisherhg@charter.net
Ben Doup: (312) 415-5450; doup@fauske.com

Please adhere to the following guidelines for abstract submission.

- Name and title of the proposed presentation
- Length of time required for presentation (allow 5 minutes for questions)
- Dates and times available for presentation
- Best contact information: email, phone
- Abstracts should be one paragraph long, max. 200 words

Abstracts will be reviewed by the DIERS Program Committee and presenters will be sent formal abstract acceptance notes.
Review and Application of Existing DIERS Technology
• Case studies illustrating the implementation of DIERS ERS technology
• Case studies of safeguarding of runaway reactions
• Review of previous DIERS discussions/presentations on a specific topic

Incident Investigations
• CSB and other’s investigation results
• Learnings from meeting attendees (i.e., their companies)

Modelling and Simulation
• Pressure relief valve stability methods
• Modeling of pool and jet fires
• Relief design for systems with solids
• Dispersion analysis

Experimental Method
• Experimental design and interpretation of calorimeter data
• Calorimeter development for reactivity evaluation
• Experimental studies on specific systems
• ASTM developments

ERS Hardware
• Relief device characteristics, performance, operational behavior, problems, etc.

Codes, Standards, Regulations, and RAGAGEP
• API, ASME, EPA, ISO, NFPA, and OSHA developments
• Transport of hazardous material
• Safe discharge locations

Safety in Energy Storage Systems
• Batteries - calorimetry testing and modeling
• Hydrogen storage and transport
• Hydrogen fuel cells
