VISION 20/20 | CCPS
An AIChE Technology Alliance
Center for Chemical Process Safety

Committed Culture

In a **Committed Culture,** executives involve themselves personally, managers and supervisors drive excellent execution every day, and all employees maintain a sense of vigilance and vulnerability.

What does it mean in 20/20?

All employees and contractors commit to "do it right" and have a plan for when it goes wrong.

- Executives personally and visibly lead process safety.

- Operators and mechanics diligently follow procedures and speak up when they suspect a problem or see an opportunity for improvement.

- Supervisors and managers verify work is done properly, intervene to correct situations, and openly communicate negative news to management.

What is the value?

Doing "the right thing, the right way" shift after shift, day in and day out, prevents incidents.

A **Committed Culture** supports both safe AND reliable operations.

What can I do?

☑ Perform all tasks, correctly, every time.

☑ Support your leadership in demonstrating a commitment to process safety.

☑ Recognize that "it could happen here…"
