

6th International Conference on Stem Cell Engineering **Sponsorship & Exhibit Opportunities**

December 5-7, 2018 • Los Angeles, CA • www.aiche.org/stemcell

The 6th International Conference on Stem Cell Engineering is presented by the Society for Biological Engineering and will bring together leaders and trainees from cutting edge fields of stem cell engineering including basic and applied studies to discuss progress and needs to develop the next generation of stem cell technologies. Stem cell engineering is a distinct field at the intersection of stem cell biology, engineering and regenerative medicine. The understanding of how biophysical and biochemical cues in the cells' surrounding regulate cell fate and differentiation can be harnessed for the development of novel approaches to modulate stem cell behaviors and leading eventually to their clinical utilization. As stem cell knowledge matures, its appropriate translation to the clinical setting is crucial for success. Thus, in addition to fundamental studies, this conference will focus on approaches to monitor stem cell responses, enhance regeneration through material properties, uncover the immunological response during regeneration and the accurate design of clinical trials in an effort to unlock the therapeutic potential.
