

International Conference MICROBIOME ENGINEERING

DECEMBER 7-9, 2020

Participate in the **Virtual International Conference on Microbiome Engineering (ICME 2020)** – an event that brings together experts from industry and academia worldwide to discuss the challenges in microbiome engineering and the future of related fields.

REASONS TO JOIN

Learn – Get caught up with the latest developments in microbiome engineering from leading experts

Engage – Help promote new ideas and solutions to significant challenges other researchers are facing

Network – Develop your network and make valuable connections for current and future projects

Inspire – Share your work and help with advances in research

SESSION TOPICS

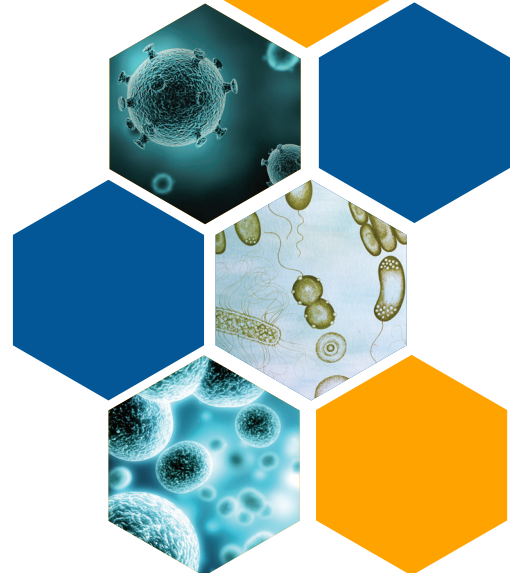

- Microbiome Therapeutics: Additive approaches
- Microbiome Therapeutics: Subtractive approaches
- Microbiome Therapeutics: Modulatory approaches

Submit an abstract, register and learn more about ICME 2020

KEYNOTE SPEAKERS

Michael Fischbach
Stanford University

Justin Sonnenburg
Stanford University

Tim Lu
MIT

CONFERENCE CHAIRS

Mark Mimee
University of Chicago

Liz Shepherd
Novome Biotechnologies

ORGANIZING COMMITTEE

Adam Arkin
UC Berkeley

Mark Charbonneau
Synlogic

Cesar de la Fuente
University of Pennsylvania

Fatima Enam
Stanford University

Chun-Jun Guo
Weill Cornell

Rachel Haurwitz
Caribou Biosciences, Inc.

Bryan Hsu
Virginia Tech

Tim Lu
Massachusetts Institute of Technology

Michelle O'Malley
University of California Santa Barbara

Justin Sonnenburg
Stanford University

Ophelia Venturelli
University of Wisconsin-Madison

Harris Wang
Columbia University
