

VIRTUAL

OCTOBER 13-15, 2020

Participate in the **2020 Global Symposium on Waste Plastic**, and join experts from a variety of engineering and related disciplines in areas that can contribute to the development of alternative plastics and mitigate the effects of traditional plastics in our environments.

SESSION TOPICS

- Incorporating into the Consumer Market
- Plastic Waste Across the Supply Chain
- Policy Considerations
- Recycle and Re-use
- Replace-Creation of New Materials
- Technology Challenges and Opportunities

Submit an abstract, register and learn more about the Global Symposium on Waste Plastic
